

FYRAN BOATS

Dinghy Series

From the Fyran 8 to the spacious Fyran 16 and the wide bodied 385, the dinghy series is based on tested and proven designs which have been developed by Fyran and Parkercraft for New Zealand conditions over the last 40 years.

Easily stowed or towed, light and economical, easy to maintain and built to take the knocks, the Fyran dinghy range is multi functional and extremely user friendly whatever the purpose you intend.

Fyran leads the New Zealand boat industry with it's positive flotation dinghy design where oversize seats provide tested reserve buoyancy for the boat, motor and passengers in the event of a mishap.

So, whether you need a tender for your cruiser or a lightweight but rugged fishing boat, the dinghy series will provide the ideal solution for everyone from first time boaties to experienced anglers.

As well as a comprehensive list of standard features, you can customise your Fyran to suit your exact requirements with our extensive range of factory optional extras.

Note: Optional equipment is illustrated within some photographs. Consistent with Fyran's policy of building the best quality products at affordable prices, we reserve the right to amend specifications and construction materials at any stage without notice. Consult your authorised Fyran Dealer for confirmation of current standard and optional equipment.

FYRAN 10 SPECIFICATION	
Length	3130mm
Beam	1360mm
Hull Thickness	1.6mm
Weight	45kg
Max HP	10HP
